

Remote Learning with Seesaw:

Parent Information

We are excited to be introducing Seesaw throughout the school. Seesaw empowers students to independently document their learning using built-in tools, and provides an authentic audience for their work. Seesaw gives students a place to communicate an understanding of their learning, be creative and learn how to use technology in a safe online environment.

How does Seesaw work?

Each student will have their own journal set up in their 'Class' and they will be able to add things to it, like photos, videos, drawings, or notes. This will be of enormous benefit for assessments, feedback, support and send-in tasks. It also provides a safe place for children to keep in touch with their teacher and their class mates.

What are the benefits?

Students	Families	Teachers
<ul style="list-style-type: none">• Encourages deeper learning and reflection.• Students can share their work with other students and respond to work.• Opportunities for students to collaborate with teachers and other students.• Develops digital citizenship skills in a managed environment.	<ul style="list-style-type: none">• All classwork and activities are stored in one place.• Receive feedback from class teachers.• Accessible from any device, any times, anywhere.• Access to support and feedback.	<ul style="list-style-type: none">• Work appears "live" so that feedback is able to be more timely and relevant to our students.• Teachers will be able to provide feedback using a range of tools.• Teachers can assign "Activities" for the students to complete, allowing them to monitor progress.• Teachers can use Seesaw to support student learning (video tutorials, links to documents, etc)
